

# A PATH OF EXCELLENCE

**Orthopaedic Associates of Corpus Christi** announces the formation of **South Texas Bone & Joint**, a next-generation musculoskeletal center dedicated to health and wellness.

By: [REGINALD JACKSON]

The largest and most comprehensive group of orthopaedists in the community is completing a major renovation of the office and enhancement of their brand. The redesigned office will help the practice continue leading a path of excellence in patient care, with a focus on immediate and long-term community medical needs.

This next-generation musculoskeletal center offers multiple examination rooms and specialty treatment areas for diagnostic X-ray, ultrasound, casting and comprehensive medical equipment customization. The center also offers the asset of friendly and knowledgeable staff, multi-level and priority, and limited mobility patient parking.

Elements throughout the redesigned office were chosen with the patient in mind, and they include comforting décor with soothing colors. The space is further enhanced by complimentary Wi-Fi Internet access, flat-screen televisions and more.

"From the moment a visitor enters the office, our

patients and other guests know they have come to the right place," Dr. Ryan Thomas says. Additional providers add, "Our facility combines state-of-the-art treatment, excellent service and a space with meaningful design dedicated to health and wellness."

The facility is destined to become the model orthopaedic care center in the region, and it is also leading with another first: the South Texas Bone & Joint "Priority Care Center." This walk-in, musculoskeletal-specific, no-appointment-mandatory clinic is designed to facilitate same-day visits that forego long waits in the emergency room. A primary goal is to help patients with non-emergent orthopaedic injuries avoid the expense and wait times associated with the traditional ER visit.

The practice is comprised of all subspecialty-trained orthopaedists covering adult spine surgery, foot and ankle surgery, surgery of the hand and upper extremity, adult joint reconstruction, hip and knee replacement, sports medicine and knee and shoulder surgery.

The team of physicians represents the only collection of specialized surgeons of its kind in all of South Texas. The eight doctors are supported by four physician assistants and a certified nurse practitioner, who collectively have multiple years of specialized experience.

**FROM THE MOMENT THEY ENTER THE OFFICE, OUR PATIENTS AND OTHER GUESTS KNOW THEY HAVE COME TO THE RIGHT PLACE."**

South Texas Bone & Joint continues a greater than 40-year dedication to providing exceptional orthopaedic care throughout the Coastal Bend and beyond, upholding a theme of excellence in patient care. No matter the name, the physicians and staff of South Texas Bone & Joint remain, as always, dedicated to the health and wellness of South Texas.
